

Your health care. Your gifts.
Your Impact.

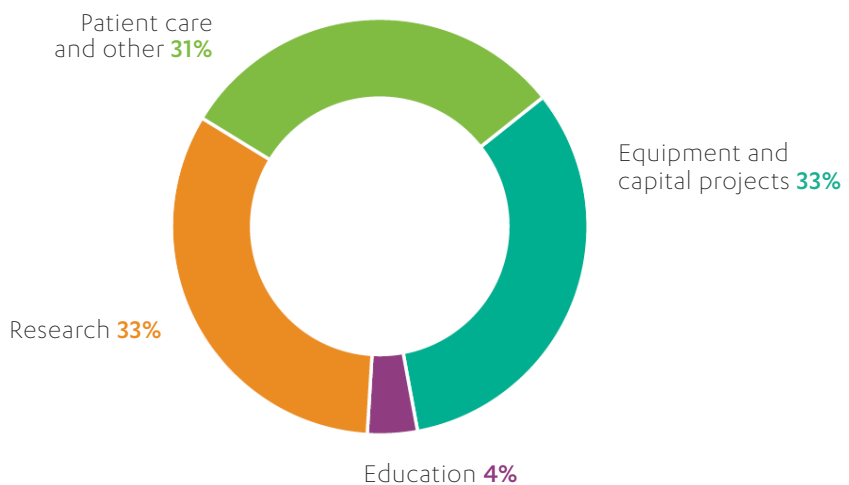

Our health care teams are some of the best in the country. These are the people who are here for us round-the-clock, 24 hours a day, seven days a week, ready to care for the sickest patients and solve the most complex medical cases. Despite the extraordinary challenges pressed upon them from this pandemic, they bravely stepped forward to care for our loved ones. **And through it all, you, our donors, were there for them.**

Your support transforms health care

Last year, gifts supporting the most urgent needs of our healthcare partners funded almost **\$5 million in critically needed equipment** and more than **\$1 million in research**. Donations to VGH & UBC Hospital Foundation are distributed to four key pillars of health care: patient care, equipment and capital projects, education and research.

Your support provides life-saving equipment

Donations directly translate to cutting-edge tools and equipment in the hands of the best minds at VGH and UBC Hospital. This past year, your gifts purchased: **new generation ventilators for our ICU** with advanced features to improve outcomes, reduce complications and shorten ICU stays; **mobile electrocardiograph (ECG) machines** which provide vital heart rhythm and electrical activity data; a **blanket warming cabinet** to offer patients rapid comfort while keeping vital fluids warm to avoid unnecessary impact on patient temperatures, and much more.

Your support powers world-leading research

In addition, world-leading research is fueled by donor funding, allowing our clinician-scientists to pursue their best ideas to improve treatments and save lives. From investigations into the future of **artificial intelligence and the detection of abnormal heart function**, to addressing feelings of **loneliness in long-term care residents**, your support is enabling our researchers to question and push our standards of care to new levels of excellence.

Thank You

Your generosity touched the lives of more than one quarter of BC's population. With your help individuals were able to get back to their families and the moments that matter. Thanks to innovations in clinical care and research made possible by you, we will continue to make breakthroughs in health care for patients. **Thank you.**
